AFRE

Our Partnership Journey

Working together in
building a fully
Connected,
Intelligent World ...

DOING MORE TOGETHER

Ascending to new heights with Huawei. AFRO has been working closely with Huawei and its carrier partners from around the world to build cost efficient, innovative, and intelligent Telecom and ICT infrastructure. Our goal is to accelerate digital transformation, drive innovation, and make Huawei's vision for building early success in 5G a reality.

We carried out our work for Huawei with a permanent focus on security, value and performance.

Our combined global leadership in mobile and fixed network infrastructure with the software, services and advanced technologies to serve customers around the world.

**YOUR
PARTNERS
IN INNOVATION**

AFRO Engineering Company Ltd. was founded in **2004**. We possess a wealth of experience in the **ICT** marketplace for providing reliable and quality services to a variety of customers. With steady growth in our client base all over **Africa** and **Middle East**; AFRO has established local offices to respond to the demands of all Huawei clients Specially.

Huawei develop over 20 years as one of fastest in Telecom sector. with the best products and we're very happy to be part of this success. Today, one of the key trends is the fourth industrial revolution, and Huawei is one of the pioneers making this revolution a reality with its large variety of equipment and solutions that today is offered to all citizens across the globe.

At AFRO we have been investing in our workforce to support Huawei by becoming the most adaptable and ready to use emerging technologies, because of the importance these technologies for Huawei to sustain its market leadership.

OUR HISTORY

The world has made it through digital revolution. We lived, learned, worked and socialized online. It has been a vast change, which happened quickly with global impacts on societies and cultures. Our customers were put under immense pressure. But with our help, they delivered. This reminds us that connectivity is not a 'nice to have'. It is a fundamental part of modern society, one that AFRO has a responsibility to provide. And we are doing so.

COMPANY STATISTIC

 **2.5K+** Global Employees

 **700+** Industry specific Specialist Engineers

 **30K+** Technical & Specialist Training Hours

 **50+** Countries & Global Footprint

 **100+** Direct Customers & Operators

 **50M+** Telecom Towers & Fiber Cables served

"AFRO Vision 2030 is a plan to usher in Wireless Networks into the Intelligent and Autonomous Era in partnership with Huawei..."

Mohamed Nasr Mahmoud Abdrabou
Chairman, AFRO Group

FORGING FORWARD STRONGER

AFRO remains committed to openness and collaboration for shared success. We work with various industry and ecosystem partners to shape new mindsets, and new models for cooperation and building trust. Our most trusted partner has been Huawei and Together, we will build a harmonious and healthy global industry ecosystem.

The vast continent of Africa is one of the most exciting places for telecommunications growth in the world, underpinned by strong macroeconomic tailwinds. Over the next five years, the continent is expected to see some of the fastest growth globally, with the region forecast to deliver five of the top ten fastest-growing economies and nine of the top ten fastest-growing cities. Africa's population will almost double during this period. More than 67% of Africa's population is under 30 and it is the young who drive the demand for mobile. And yet, mobile penetration in Africa is still low: less than half the population uses mobile. And of all mobile users, only 20% are experiencing 4G, but excitingly, demand is growing rapidly. The Middle East mirrors many of Africa's attractive characteristics. It has a rapidly growing population, forecast to see 39% growth from its current 257 million to 357 million by 2050. Mobile penetration, although higher than Africa at 66%, remains below developed markets, such as the US at 85%. Additionally, data usage is expected to grow substantially with 4G and 5G subscriptions expected to increase by 80% between 2021-26.

Carrier Cloud Transformation

At AFRO, we are excited to support Huawei in these transformations by helping increase network value, accelerate service innovation, and optimize telecom operations to unleash the benefits of connectivity. Cloud is becoming a crucial part of industrial digital transformation, and is now considered a key economic factor because of its ability to reshape the economic structure and market landscape of individual industries. The telecom industry has already entered in a critical stage of its own cloud transformation, resulting in many new opportunities and challenges. 15% of operators are expected to develop and fully implement a comprehensive cloud strategy by the end of 2023, resulting in a telecommunications cloud market worth hundreds of billions of dollars. To support this expansion and take advantage of the new markets these technologies are creating, AFRO has prioritized the expansion of our solutions to support Huawei enterprise services through the establishment of AFRO Academy and R&D "Innovation Hub".

We would like to thank all the leadership, management and teams in Huawei our special relationship and the celebration of our partnership and future success together.

In world of Telecommunications where challenges are permanently rising, We 've been emerged as a reliable partner for operators and the most reliable equipment suppliers rendering

added value services and developing a strong, skilled and cost -effective partnership to meet the targets and face the challenges of today's market.

in terms of complexity, time constraints and high competitiveness. AFRO is a partner of choice for global Vendors & Operators.

Partnership Evolution over the years...

Achievements with Huawei

AFRO's Success Road Map

We covered 15 African, 4 GCC countries with well established local offices and global footprint over 30 countries and over 2500 employee within 15 years of delivering operational and management excellence.

Operational Capabilities, Partnerships & Investments

We're expecting great potentials for expansion and growth. We Plan for steady growth of accumulated 75% in our group for the next three years within existing traditional accounts. Nearly to 50% growth is planned within 2022 due to new markets Just launched last quarter. In Parallel route another plan to explore new markets territories and industries like, Libya and Renewable Energy industry in West Africa and Libya.

Partnership Revenue

Since the beginning of AFRO's partnership with Huawei, we have demonstrated our commitment to serving Huawei, with fully trained, dedicated and staffed office that employs high skilled local staff with management oversight from our AFRO's Head Office. This close proximity to customers allows extremely efficient support and service delivery. By investing in the skills and capabilities of our local employees, and by establishing offices throughout the continent, AFRO has built a good market reputation, while enterprises are confident in Huawei's technology on their path to digital transformation through AFRO's dedication and commitment to Huawei.

AFRO have established AFRO Academy to provide Huawei's training materials, to become the strategic partner with the highest number of Huawei-certified professionals in Africa. When an enterprise decides to undergo digital transformation — a process that is becoming increasingly critical — having such a solid team behind them is imperative and so we have also developed the R&D Department to interface with Huawei as Innovation Hub.

Group Market Share

As Africa expands its Information and Communications Technology (ICT) infrastructure to become a major player in the global market, digital transformation has unlimited potential to drive development in the region, boost economic growth and improve the quality of peoples' lives.

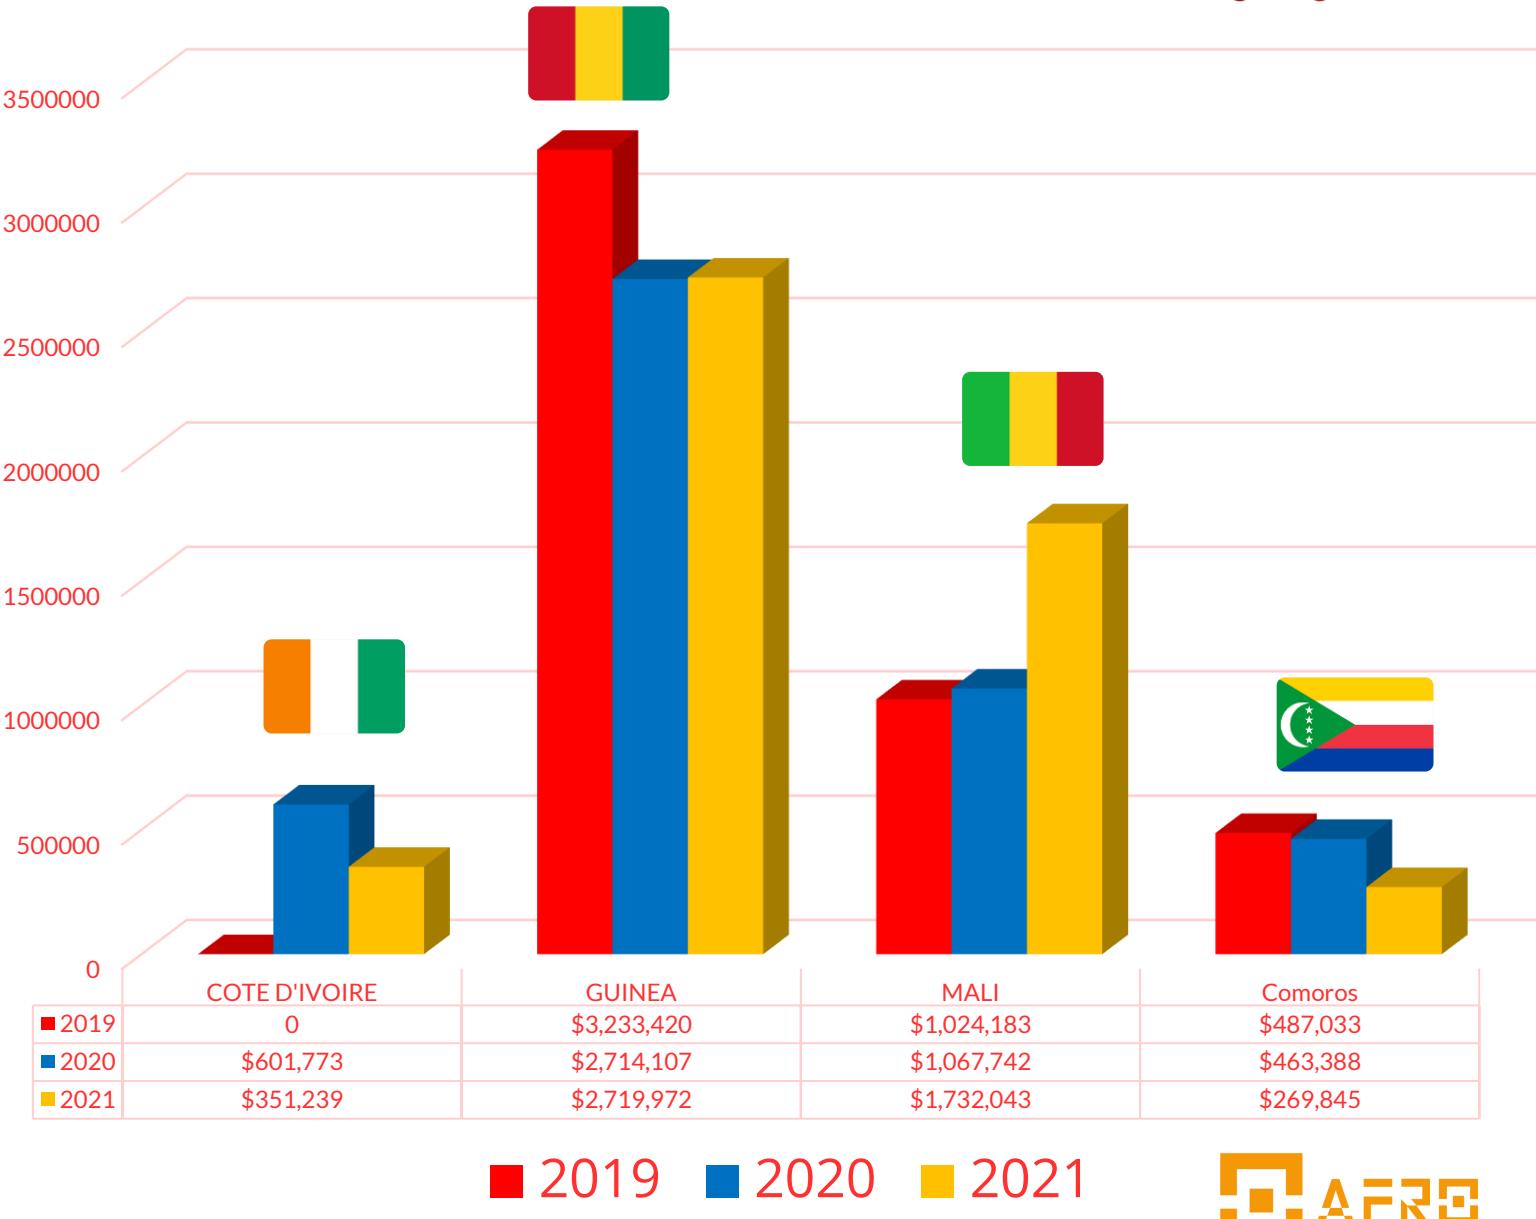

But merely getting people online is not enough. If Africa is to truly compete on a global scale, ICT penetration across the entire continent is essential. In short, deploying advanced ICT to drive digital transformation throughout Africa is of critical importance. Choosing to partner with Huawei was an easy decision. Huawei is constantly innovating, and it is at the forefront of solutions that drive digital transformation. From storage to wireless products, Huawei offers it all. AFRO partnership with Huawei will ensure we continue to grow our Africa market share together whilst delivering value and excellence for businesses and communities.

In West Africa with Huawei

As Africa expands its Information and Communications Technology (ICT) infrastructure to become a major player in the global market, digital transformation has unlimited potential to drive development in the region, boost economic growth and improve the quality of peoples' lives.

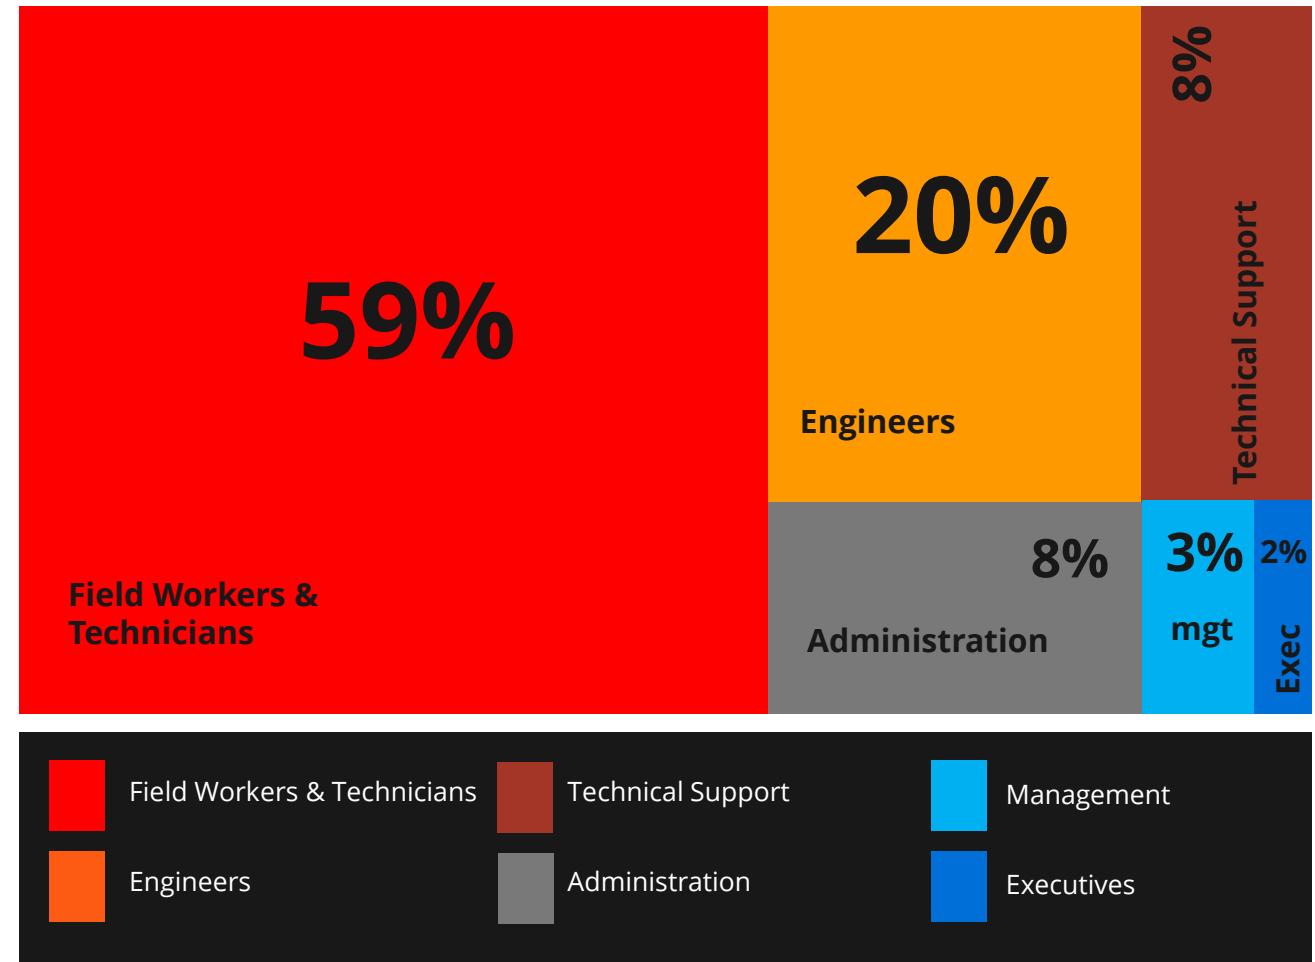

But merely getting people online is not enough. If Africa is to truly compete on a global scale, ICT penetration across the entire continent is essential. In short, deploying advanced ICT to drive digital transformation throughout Africa is of critical importance. Choosing to partner with Huawei was an easy decision. Huawei is constantly innovating, and it is at the forefront of solutions that drive digital transformation. From storage to wireless products, Huawei offers it all. AFRO partnership with Huawei will ensure we continue to grow our Africa market share together whilst delivering value and excellence for businesses and communities.

Financial Excellence

Our culture – respecting people:
We believe our people are our greatest asset and we aim to enable a culture that encourages high-performance, integrity, and inclusion. The market for skilled employees in our business is extremely competitive. Our workforce has fluctuated over recent years as we have introduced changes in our strategy to respond to our business targets and our activities. These changes may in the future cause disruption and fatigue among employees. It is imperative that we work to create and sustain a corporate culture that is motivational, inclusive, and encourages creativity and continuous learning to meet challenges. We believe that a diverse workforce is our platform for greater innovation.

Group Headcount - 2,500+

Global Services Strategy

A key focus area in Global Services is empowering CSPs to transform to digital service providers, supported by a digital architecture for the full lifecycle of network design, deployment, operations and technical support – for both legacy and cloud-based networks. The AFRO AVA cognitive use cases provide advanced AI and analytics as well as a common data lake to help boost network performance, operational efficiency and customer experience. We also help digital service providers to seize the possibilities of Internet of Things (IoT) and enter new markets using AFRO Worldwide IoT Network Grid (WING), which provides seamless connectivity across geographical borders and technologies. We enable our customers to enter new markets rapidly and with low risk through pay-as-you-grow or revenue share models.

SERVING CRITICAL NETWORKS

Networks are playing an increasingly important role in society. This is allowing us to extend our focus to serving critical networks beyond CSPs.

TOTAL COST OF OWNERSHIP

Critical networks are built based on a best-of-breed approach with network elements selected on a best performance per Total Cost of Ownership (TCO) basis.

FINANCIAL RETURNS

Technology leadership underpins momentum and financial returns in critical networks.

TECHNOLOGY LEADERSHIP

Invest in the next technology window – where there is no path, we will reassess segment participation.

BUSINESS DIVERSITY

Value in critical networks is migrating away from monolithic systems towards silicon, software and service, and will be captured through different business models.

INVEST IN INNOVATION

Sustained investment in long-term innovation provides us with a platform to take the long view.

Service Provider

As industries' digitalization unfolds, we see 5G, cloud, and IoT picking up speed and disrupting how enterprises work, think, and serve their customers – all driving fundamental change in what networks need to deliver – representing a perfect opportunity for service providers. AFRO partners with service providers to provide new positions of strength through our Global Partner Program, providing them with a broad set of solutions and deep experience in delivering mission-critical infrastructure across a wide range of industries. We help them bring the right value to their enterprise customers to achieve a sustainable competitive advantage.

Supplier Partners

Why is it important to engage?

To develop our supplier relationships into true partnerships takes time and effort by both parties to bring about successful collaborations. We streamline our supplier base so that we can focus on, and invest in, a select few, developing true partnerships that create mutual value. Cultivating sustainable long-term relationships is essential in order to build and maintain assets that need to last for decades.

How we engage with our supplier Partners?

- Regular business reviews
- Industry training activities
- Industry symposiums

“Our ambition is to build an engaged, happy, creative and productive workforce by fostering an inclusive and collaborative environment that reflects our vision and our values.”

Awards & Accolades

We've received recognition for our achievements in a variety of areas from a range of different sources from product design to sustainability.

Every day at AFRO, we try to be the best we can be

– as an innovator, as a company, as a brand, and as an employer. And we're pleased to say that our efforts don't go unnoticed.

From Service Delivery to Business Excellence, we've received recognition for our achievements in a variety of areas from a range of different sources. Here are just a few examples:

Health, Safety & Labor Policy:

AFRO creates innovative solutions aiming to unite communities and help billions of people live more connected lives, whilst at the same time recognizing our health and safety responsibilities and our wider commitment to sustainability and corporate responsibility.

The protection and improvement of the health and safety of everyone who works for or with AFRO, is a guiding principle in all our operations worldwide. This occupational health, safety and labor conditions policy is based on AFRO Code of Conduct and employment policies and practices, the key principles of which are that AFRO will:

1. Provide healthy and safe working conditions and promote well-being and fair treatment at work.
2. Ensure compliance with all applicable occupational health and safety and labor legislation along with other requirements to which we subscribe (including customer specific requirements as well as industry best practices)
3. Integrate occupational health and safety management into our business and processes including design, production, distribution, installation and support of our product and systems.
4. Emphasize the accountability and responsibility of management and employees for healthy, safe working conditions and fair treatment for all who work for or on behalf of AFRO.
5. Strive to continuously improve our health and safety performance through risk management, consultation and participation to prevent work-related accidents, ill health, diseases and incidents and by developing and implementing new working practices and technologies, which enhance our employees' health and safety.
6. Ensure that our products are safe, and work with our suppliers and customers to promote responsible use throughout their life cycle.
7. Promote a healthy life-style and support voluntary activities that enhance health, wellbeing and work-life balance.
8. Promote occupational health, safety and labor conditions awareness through effective communication and training, sharing best practices, both internally and externally and encourage reporting of incidents, hazards, risks and opportunities.
9. Take immediate action to remedy situations where incidents, audits and feedback identify areas for improvement in our health, safety and labor conditions management.
10. Ensure our suppliers, contractors and other business partners follow the same standards and place equally high priority on health, safety and labor conditions in their operations

Total Quality Policy

At AFRO, we are customer centric, and this shapes how we conceptualize and practice quality. We are committed to creating value for our customers today and into the connected future by:

1. Delivering differentiated products, services and solutions reliably and securely - first time, every time, on time, as promised.
2. Relentlessly pursuing continuous improvement of business processes and quality management to enable superior performance.
3. Constantly renewing our knowledge, skills and techniques to innovate new ways to serve customers and enable the human possibilities of technology.
4. Valuing each other, our customers and stakeholders while honoring ethical, legal and statutory obligations
